

I'm writing to test the `\footnotemark` and `\footnotetext` commands. You can insert a footnote marker using the `\footnotemark`¹ command and later, when you're ready, typeset the footnote text by writing `\footnotetext{Here's the footnote.}`.

Let's do one more to see the result² which I'll comment on within the footnote.

¹Here's the footnote.

²Specifically, I'd write comments in this one.
