

Brackets and Parentheses

John Doe

June 2026

Examples

1. Parentheses

$$F = G \left(\frac{m_1 m_2}{r^2} \right)$$

2. Square Brackets and Parentheses

$$\left[\frac{N}{\left(\frac{L}{p} \right) - (m + n)} \right]$$

3. Parentheses Across Multiple Lines

$$y = 1 + \left(\frac{1}{x} + \frac{1}{x^2} + \frac{1}{x^3} + \cdots \right. \\ \left. + \frac{1}{x^{n-1}} + \frac{1}{x^n} \right)$$

4. Summation Notation

$$y = \sum_{k=0}^n \frac{1}{x^k}$$
