

I'm writing to test¹ several footnote features. You can insert the footnote marker² using the `\footnotemark` command and later use the `\footnotetext` command to typeset the footnote text by writing `\footnotetext{Text of second footnote.}`.

I can use the same footnote³ more than once³.
Now a footnote marker using lowercase Roman numerals^{iv}.

¹Footnotes work fine!

²Text of second footnote.

³A footnote with two references.

^{iv}This footnote marker uses lowercase Roman numerals.
