

Spacing in Math Mode

Xi Ching Yuang

June 28, 2026

Introduction

Assume we have the next sets

$$S = \{z \in \mathbb{C} \mid |z| < 1\} \quad \text{and} \quad S_2 = \partial S$$

Spaces

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

$$f(x) = x^2 + 3x + 2$$

Operators Spacing

$$3ax + 4by = 5cz$$

$$3ax < 4by + 5cz$$

User-defined binary and relational operators

$$34x^2a \# 13bc$$

$$34x^2a \# 13bc$$

Reference Guide

Description of Spacing Commands	
LaTeX Code	Description
<code>\quad</code>	space equal to the current font size (=18 mu)
<code>\,</code>	$\frac{3}{18}$ (=3 mu)
<code>\:</code>	$\frac{4}{18}$ (=4 mu)
<code>\;</code>	$\frac{5}{18}$ (=5 mu)
<code>\!</code>	$-\frac{3}{18}$ (=-3 mu)
<code>\</code> (space after backslash)	equivalent of space in normal text
<code>\quad\quad</code>	twice of <code>\quad</code> (=36 mu)
