

Spacing in Math Mode

Xi Ching Yuang

June 28, 2026

Introduction

Assume we have the next sets

$$S = \{z \in \mathbb{C} \mid |z| < 1\} \quad \text{and} \quad S_2 = \partial S$$

Spaces

$$\begin{aligned} f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \\ f(x) &= x^2 + 3x + 2 \end{aligned}$$

Operators Spacing

$$\begin{aligned} 3ax+4by&=5cz \\ 3ax\j4by&+5cz \end{aligned}$$

User-defined binary and relational operators

$$\begin{aligned} 34x^2a \# 13bc \\ 34x^2a \# 13bc \end{aligned}$$

Reference Guide

Description of Spacing Commands	
LaTeX Code	Description
<code>\</code>	space equal to the current font size(=18 mu)
<code>\,</code>	3/18 (=3 mu)
<code>\:</code>	4/18 (=4 mu)
<code>\;</code>	5/18 (=5 mu)
<code>\;</code>	-3/18 (=-3 mu)
<code>\ (space after backslash)</code>	equivalent of space in normal text
